

GreenSol Ltd

GreenSol Group Of Companies Profile

GreenSol Ltd: Your Trusted Partner in Regional Oilfield Chemical Solutions

GreenSol Ltd is a dynamic, privately owned group of companies with over 46 years of specialized experience in the oil and gas sector. We deliver high-quality chemical products, custom blending services, logistics management, and technical support for both offshore and onshore operations. Our expertise spans drilling, production and completion chemicals, Fluid storage, tank rental and cleaning, and waste management services across the Caribbean and northern South America.

Our Story

The GreenSol journey began in 2005 with the founding of All Oil Services C.A. in Venezuela. In June 2010, GreenSol Ltd Trinidad was established, marking the beginning of our regional expansion.

When ExxonMobil's groundbreaking discoveries opened the Guyana-Suriname basin in 2014, GreenSol was ideally positioned to grow alongside the industry. We naturally expanded into Guyana and Suriname to support Exploration & Production activities. Today, we maintain a strong and resilient presence in Venezuela, having remained operational through challenging times and now fully prepared to support operators as activity resumes.

Strategic Regional Presence

GreenSol operates across four countries - Trinidad, Guyana, Venezuela, and Suriname - bridging three languages and four cultures. This footprint allows us to respond rapidly and effectively to the needs of operators throughout the region.

- Trinidad: One of the world's oldest oil-producing nations (since 1908), with established infrastructure and strong production prospects through 2030.
- Guyana: The world's fastest-growing economy, currently producing 900,000–1 million barrels per day and on track to reach 1.4 million by 2027.
- Suriname: Part of the same prolific basin as Guyana, with major operators including Total, Chevron, Shell, and Petronas actively developing assets.
- Venezuela: Holder of approximately 20% of the world's proven oil reserves and located just seven miles from Trinidad, offering significant long-term opportunity.

GreenSol Ltd

Products and Services

GreenSol maintains a robust infrastructure to serve our clients:

- Blending Plants strategically located in East and West Venezuela and Trinidad, with a new state-of-the-art facility under construction in Guyana (commissioning September 2026).
- Methanol Distribution: We are the dominant methanol supplier in the region, supported by a long-term supply contract with Proman, the largest methanol producer in Trinidad - the world's largest methanol exporter.
- Logistics Excellence: Our privately owned fleet of 65 stainless steel certified ISO tanks is the largest in the region. A new bulk storage facility in Guyana is scheduled for completion in Q1 2027.

Looking Ahead

GreenSol continues to invest confidently in the region's future. Our priorities include:

- Build out of an additional 20,000 sq ft warehouse and 500bbbls of additional blending to our Trinidad facility.
- Upgrades to blending capabilities at our All Oil Services Anaco plant in Venezuela.
- Major development in Guyana, including dock and bulk storage infrastructure.
- Significant expansion of our Guyana Warehouse capacity facility with an additional 30,000 sq ft warehouse (on top of the existing 25,000 sq ft).

Why Partner with GreenSol?

We understand the realities of working in frontier and emerging markets. Where others see obstacles, we see opportunity. Through innovation, persistence, and deep local knowledge, GreenSol consistently delivers results in complex environments.

We invest ahead of market growth, maintain operational resilience, and pride ourselves on getting the job done - safely, reliably, and efficiently.

GreenSol Ltd - Making the impossible happen through innovation, regional expertise, and unwavering commitment to our clients' success.
